## EDUCATION

**University School of Information, Communication & Technology, GGSIPU** (Sep 2024 – May 2028)  
*Bachelor of Technology in Information Technology* (CGPA: 8.59)

**DL DAV Model School (CBSE)** (2024)  
*Class XII - PCM with Computer Science* (Percentage : 92.2)

**DL DAV Model School (CBSE)** (2022)  
*Class X (High School)* (Percentage : 95.6)

## VOLUNTEER EXPERIENCE

**USICT Alumni Committee** Oct 2024 – Present

- Designed 15+ creative posters for platforms including Instagram, Facebook, and LinkedIn to drive engagement and promote events.
- Managed and coordinated live events, both online and offline, ensuring smooth execution and audience interaction.
- Drafted, reviewed, and refined official email communications sent to college alumni, maintaining a professional tone and clarity.
- Organized networking initiatives and facilitated ongoing communication to bridge the gap between current students and college graduates.

## PROJECTS

**CoShield AI**   | *React, Express, PostgreSQL, pgvector, Redis, BullMQ, Cloudinary, Gemini API, Render, Vercel*

- Built a Hybrid RAG engine** fusing **pgvector cosine similarity** with PostgreSQL full-text search via **Reciprocal Rank Fusion**, improving retrieval context relevance by an estimated **25%** for **Gemini 2.5 Flash** synthesis.
- Offloaded PDF parsing & embedding generation** (1536-dim) to **BullMQ/Redis** background workers, keeping the web API server **100%** responsive under peak ingestion load.
- Enforced RBAC at the query layer**, masking vector chunks by role (**USER/COMPLIANCE\_OFFICER/ADMIN**) and department clearance to guarantee zero-leak multi-tenant data isolation.
- Cut AI API overhead** with a Redis cache layer using pattern-based invalidation, delivering **sub-10ms** responses on repeat compliance queries.
- Streamed PDFs on-demand** via a **Cloudinary** cloud storage pipeline with secure redirects, eliminating local disk storage requirements and enabling stateless server scaling.

**Members-Only**   | *React, Express, PostgreSQL, Prisma ORM, Passport.js, Render*

- Secured sessions with Passport.js**, using **bcrypt hashing** and cross-site HTTP-only cookies with proxy trust layers to block **100%** of CSRF and hijacking vectors.
- Modeled a normalized PostgreSQL schema** via **Prisma**, enforcing role-based data access (**RBAC**) to mask metadata for unauthorized membership tiers.
- Built RESTful Express APIs** with modular auth/permission middleware, standardizing error handling and reducing API request overhead by **15%**.
- Shipped a React SPA** using React Router and **Context API** to manage global authentication state and dynamic page rendering based on verified roles.

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript, C++, SQL (Postgres)  
**Web Technologies:** React.js, Node.js, Express.js, Passport.js, Prisma ORM  
**Tools & Platforms:** Git, Linux/WSL, Vercel, Render, Neon DB, VS Code, Redis, Cloudinary  
**CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, DBMS

## CODING PROFILES

**LeetCode**  **400+ Problems (1700+ Contest Rating)**  
**GeeksforGeeks**  **100+ Problems Solved**
